

Claim or Claims

I announce that “a webnet hospital method of diagnosing disease and resegmenting type with wrist radius artery blood vessel pulse information” is my invention.

I think my invention is examining human wrist radius artery blood vessel pulse by using wrist radius artery digital indicator and compiling 18 kinds of radius artery blood vessel pulse standard value, graphs, comparing the determined value through digital indicator with standard value, sort out the diagnostic of resegmenting type of specific disease and disease group of 18 kinds of radius artery blood vessel pulse standard value, the difference between the determined value and the standard value would give the reasoning medical specific diagnosis result.

I think that my invention in dudes the principle of wrist radius artery blood vessel pulse information determined by wrist radius artery digital indicator (table 1), standard result menu (table3), standard result menu analyse table 4) m wrist radius artery digital indicator and its function (table 5), real flow diagram (table 6) and wrist radius artery blood vessel pulse information standard pattern data base software.
